Contractor’s Description of Service:

AT&T Standalone VoIP Handset Service Packages are a complete network based communications solutions, including handsets, and AT&T managed LAN infrastructure. Network transport, services, and applications layers are implemented transparently, allowing transport infrastructure to be independent from the services and applications that run on top of it. AT&T Standalone VoIP is a network-based, fully hosted VoIP solution, including the handset, that offers businesses a full range of advanced calling features, applications, and management tools for employees and remote workers over a single network interface

21.3.2 Services Related Infrastructure (SRI)

21.3.2.1 Extended Demarcation Wiring Services

Contractor's Description of Service:

AT&T Extended Demarcation (Extended Demarc) wiring services support the services covered by Contract for all Customer occupied buildings where services under this Contract are being offered. Extended Demarc wiring includes wire/cable related activities required to extend the demarcation point to the Customer defined termination location or cross-connect point from the Contractor's MPOE. Extended Demarc wiring shall include the necessary wire/cable, connectors, jumpers, panel, and jack. Extended Demarc wiring shall also include associated trouble shooting, testing and labeling. The Contractor shall not be required to complete Extended Demarc wiring from the MPOE to the extended Demarc location if:

1. The wire/cable pathway is blocked, and cannot be cleared without significant effort or damage to the Customer site;
2. The wire/cable pathway is in an asbestos or other environment hazardous to the Contractor's personnel, or where such work would be hazardous to the public or to the Customer's staff; or,
3. Upon written release provided by either the Customer or by the CALNET Program.
