<p>Contractor's Description of Service, include required service description, features and additional features offered by the Contractor: Provide dedicated DS1, DS3 and ISDN Private Rate Interface (PRI) access transport service for use with the LD service deployed for CALNET Legacy 4. This service shall only be utilized in conjunction with the Contractor's Long Distance service.</p> <p>Within California, provide dedicated network access transport services statewide in all Incumbent Local Exchange Carrier (ILEC) territories open to competition as defined by the California Public Utilities Commission (CPUC) where services are available either through Bidder owned facilities or through resale of approved Incumbent Local Exchange Carrier services.</p> <p>Outside of California provide dedicated network access transport services within the contiguous 48 states where facilities are available.</p>
<p>Geographic Availability: AT&T Dedicated network transport service is available throughout the United States, in all Incumbent Local Exchange Carrier (ILEC) territories open to competition as defined by the governing Public Utilities Commission where facilities are available either through AT&T-owned facilities or through resale of Incumbent Local Exchange Carrier facilities.</p>
<p>Service Limitations and Restrictions: Dedicated network transport services may only be used in conjunction with AT&T Services.</p>
<p>State Associated Administrative Fee (SAAF) Charge: Services identified below with "Yes" in the SAAF Applied column will have a 2.5% fee applied to the Monthly Recurring Charge or usage. Charges below do not include the SAAF. The SAAF will appear as a separate line on the customer's invoice.</p>

	Switched Digital Services-Data Transmission (SDDN)	See Below		AT&T's Software Defined Data Network (SDDN) allows end-to-end digital transmission at speeds of 56 kbps or 64 kbps and is available in two modes: static and dynamic. In the Static Mode, access to the network is full time at 56 kbps. In the Dynamic Mode, CALNET II users may initiate 56 kbps calls on a call-by-call basis via the use of a feature code. Dynamic Mode requires a digital PBX. With the use of ISDN utilizing a PRI, CALNET II users will be able to transmit data at 64 kbps in either Static or Dynamic Mode.

There are two types of Screening Groups: 1. Allowed Screening Groups: Contain numbers that members of a Caller Group are allowed to call. Implicit in this statement is that all other numbers dialed would be blocked. An example of an allowed Screening Group is a list consisting of area codes on the East Coast. All other calls would be blocked. 2. Blocked Screening Groups: Contain numbers that members of a caller group are not allowed to call. Implicit in this statement is that all other calls would be allowed to route. An	\$200.00	\$50.000	\$0.00	Yes	No	Required

All on-net locations that will be originating SDN traffic must be associated with a Station Group. When a call originates from a location, the customer's database will determine which Station Group is associated with that originating number for purposes of screening. 2. Table 16.2.3.6.a – Long Distance International Calling

<p>Contractor's Description of Service, include required service description, features and additional features offered by the Contractor: Outbound International long distance services provided through AT&T's SDN (Software Defined Network) OneNet platform. The SDN platform supports all International calling requirements to the following countries with rates based on access type (dedicated and switched) and time of day. SDN is a custom network service that will provides a virtually private network with either dedicated (DS1, DS3, ISDN PRI) or switched (Dial 1) access.</p>
<p>Geographic Availability: AT&T Dedicated network transport service for International calling is available throughout the United States, in all Incumbent Local Exchange Carrier (ILEC) territories open to competition as defined by the governing Public Utilities Commission where facilities are available either through AT&T-owned facilities or through resale of Incumbent Local Exchange Carrier facilities. For switched access requires a Primary Interexchange Carrier Code (PIC Code) be applied/supported by the Incumbent Local Exchange Carrier (ILEC).</p>
<p>Service Limitations and Restrictions: Mobile terminations are any U.S. originating outbound calls that terminate on a mobile service outside of the U.S. In some countries, this simply means a mobile telephone. In others, "mobile" may be defined as any service which provides "mobility" to a customer, such as "personal follow me numbers" in the UK. Outside of the United States, mobile is largely a "Caller Pays" environment. This requires the foreign carrier to look to the call originator (in the U.S.) for payment. Mobile Terminations are not related to the type of phone used to place the call. Rather it is how it terminates that determines the call type.</p>
<p>State Associated Administrative Fee (SAAF) Charge: Services identified below with "Yes" in the SAAF Applied column will have a 2.5% fee applied to the Monthly Recurring Charge or usage. Charges below do not include the SAAF. The SAAF will appear as a separate line on the customer's invoice.</p>

Table 16.2.3.6.f Additional International Long Distance Countries Offered by the Contactor

<p>Contractor's Description of Service, include required service description, features and additional features offered by the Contractor: Outbound International long distance services provided through AT&T's SDN (Software Defined Network) OneNet platform. The SDN platform supports all International calling requirements to the following countries with rates based on access type (dedicated and switched) and time of day. SDN is a custom network service that will provides a virtually private network with either dedicated (DS1, DS3, ISDN PRI) or switched (Dial 1) access.</p>
<p>Geographic Availability: AT&T Dedicated network transport service for International calling is available throughout the United States, in all Incumbent Local Exchange Carrier (ILEC) territories open to competition as defined by the governing Public Utilities Commission where facilities are available either through AT&T-owned facilities or through resale of Incumbent Local Exchange Carrier facilities. For switched access requires a Primary Interexchange Carrier Code (PIC Code) be applied/supported by the Incumbent Local Exchange Carrier (ILEC).</p>
<p>Service Limitations and Restrictions: Mobile terminations are any U.S. originating outbound calls that terminate on a mobile service outside of the U.S. In some countries, this simply means a mobile telephone. In others, "mobile" may be defined as any service which provides "mobility" to a customer, such as "personal follow me numbers" in the UK. Outside of the United States, mobile is largely a "Caller Pays" environment. This requires the foreign carrier to look to the call originator (in the U.S.) for payment. Mobile Terminations are not related to the type of phone used to place the call. Rather it is how it terminates that determines the call type.</p>
<p>State Associated Administrative Fee (SAAF) Charge: Services identified below with "Yes" in the SAAF Applied column will have a 2.5% fee applied to the Monthly Recurring Charge or usage. Charges below do not include the SAAF. The SAAF will appear as a separate line on the customer's invoice.</p>
