Table 15.3.3 - Services Related Hourly Support.....	204

The services within this catalog will expire June 30, 2027, and no replacement contract is currently available. Customers should make plans for alternative solutions to replace their Legacy telecommunications.

Table 15.2.2.3 - Carrier DS0 Services and Features

Contractor's Description of Service, include required service description, features and additional features offered by the Contractor: DS0 service supports point-to-point and multipoint/multi-drop digital data circuits up to 64 Kbps providing full duplex, four wire, synchronous serial digital data transport.

DS0 service includes the following:

- Advanced Digital Network (ADN) -is a dedicated digital private line service at DS0 and below speeds, providing full duplex, 4 wire, end-to-end, synchronous, data transport.
- Subscriber Access - Channel termination for the DS0 circuit.
- Customer Network Reconfiguration - Allows changes to connections of individual circuit segments at digital cross connect node.
- Inter-LATA Service - Required to cross LATA boundaries.

DS0 service is in accordance with the North American T-carrier and applicable ANSI and ITU Standards. Bridging, multiplexing, and reconfiguration are additional features.

Geographic Availability: Throughout the AT&T California service area

Service Limitations and Restrictions: Subject to availability of facilities

The services within this catalog will expire June 30, 2027, and no replacement contract is currently available. Customers should make plans for alternative solutions to replace their Legacy telecommunications.

State Associated Administrative Fee (SAAF) Charge: Services identified below with “Yes” in the SAAF Applied column will have a 2.5% fee applied to the Monthly Recurring Charge or usage. Charges below do not include the SAAF. The SAAF will appear as a separate line on the customer’s invoice.

Table 15.2.2.3 - Carrier DS0 Services and Features

Line Item #	Feature Name	Contractor's Product Identifier	Unit of Measure	Feature Description	Feature Restrictions, Limitations and Additional Information	Non-Recurring Charge	Monthly Recurring Charge	Cost per Change	SAAF Applied (Yes/No)	Delegation Needed (Yes/No)	Required or Discretionary
Table 15.2.2.3.a - Carrier DS0 Services and Features											
1	IntraLATA DS0 Service	VAN4P	Channel Term	IntraLATA carrier DS0 service. Channel Termination (one end point)	2 or more required per circuit	\$0.00	\$39.00	N/A	Yes	No	Required
2	InterLATA/ Interstate DS0 Service	1LNR9	Channel Term	InterLATA/Interstate carrier DS0 service. Channel Termination (one end point)	2 required per circuit	\$0.00	\$39.00	N/A	Yes	No	Required
3	IntraLATA Variable Mileage for Dedicated DS0 Transport	1L57X	Mile	IntraLATA variable mileage for dedicated DS0 transport. Mileage is	Required when locations are in different Serving	N/A	\$1.18	N/A	Yes	No	Required

Table 15.2.2.3 - Carrier DS0 Services and Features

				Advanced Digital Network (ADN). The ADN channel termination connects the customer's site with the serving central office at 2.4 Kbps (DS0 subrate).							

Table 15.2.3.3 - Carrier DS1 Services and Features

Contractor's Description of Service, include required service description, features and additional features offered by Contractor: A dedicated digital private line service at DS1 speed, providing full duplex, four-wire, end-to-end, synchronous, data transport between two locations. A dedicated, point-to-point DS1 service transports data from site to site. It travels through the local CO, or to another CO, then to its destination. Because it is a dedicated circuit, it is not switched in the CO. DS1 gives provides these features:

- Clear Channel Capability (CCC)—gives you full 64 Kbps capacity on the 24 DS0 channels of a DS1, for a total bandwidth of 1.544 Mbps. Also known as B8ZS (Bipolar Eight-Zero Substitution), you choose the CCC signal format option instead of alternate mark inversion (AMI). The customer's channel service unit (CSU) and facilities must be equipped to handle clear channel.
- InterLATA Service—Point-to-Point DS1s are available for InterLATA (within and outside of California) and IntraLATA traffic.
- Extended Super Frame (ESF)—ESF is a framing format that allows the additional bits to be added less frequently or at longer intervals. Bits gained by doing this are then used to perform other functions. AT&T supports this format, which a customer would request at the time of ordering of the service.

The following options are available with DS1:

- Central Office Multiplexing—lets us use a channel bank or other multiplexing device at the central office to divide your DS1 into a maximum of 24 DS0 channels.
- Customer Network Reconfiguration - Allows changes to connections of individual circuit segments at digital cross connect node.

Geographic Availability: Throughout the AT&T California service area

Service Limitations and Restrictions: Subject to availability of facilities.

The services within this catalog will expire June 30, 2027, and no replacement contract is currently available. Customers should make plans for alternative solutions to replace their Legacy telecommunications.

State Associated Administrative Fee (SAAF) Charge: Services identified below with “Yes” in the SAAF Applied column will have a 2.5% fee applied to the Monthly Recurring Charge or usage. Charges below do not include the SAAF. The SAAF will appear as a separate line on the customer's invoice.

Table 15.2.4.3 - Carrier DS3 Services and Features

Contractor's Description of Service, include required service description, features and additional features offered by the Contractor: A dedicated digital private line service at DS3 speed, providing full duplex, four-wire, end-to-end, synchronous, data transport between two locations. DS3 service supports point-to-point digital data circuits up to 44.736 Mbps providing full duplex, synchronous serial digital data transport. DS3s may be clear-channel or channelized into 28 channels.

Carrier DS3 service shall include the following:

- High Capacity DS3 - Describes High Capacity DS3 Class of Service.
- Subscriber Access Line with Equipment - DS3 circuit termination per termination with electrical equipment.
- Central Office Multiplexing - An arrangement that converts a 44.736 Mbps channel to 28 DS1 channels using digital time division multiplexing DS3 service shall be in accordance with the North American T-carrier, and applicable ANSI and ITU Standards.

Geographic Availability: Throughout the AT&T California service area

Service Limitations and Restrictions: Subject to availability of facilities.

The services within this catalog will expire June 30, 2027, and no replacement contract is currently available. Customers should make plans for alternative solutions to replace their Legacy telecommunications.

State Associated Administrative Fee (SAAF) Charge: Services identified below with “Yes” in the SAAF Applied column will have a 2.5% fee applied to the Monthly Recurring Charge or usage. Charges below do not include the SAAF. The SAAF will appear as a separate line on the customer’s invoice.

4	IntraLATA Local Calling up to 12 miles	USGZ12	Minute	Local calling service up to 12 miles.	Local Usage Only	N/A	\$0.0081	N/A	Yes	No	Required
Table 15.2.5.3.b - ISDN PRI Configurations											
5	PRI 2 B Channel Transfer	2BTPG	Feature	Allows the ISDN PRI to connect two calls, transfer the call together and then release the parties from the ISDN PRI		\$100.00	\$45.00	\$100.00	Yes	No	Required
6	Alternate Route	PRAAR	Feature	Allows customers to specify an alternate route where incoming calls may be directed when all channels are busy, or when there is a network failure or loss of continuity with the premise equipment.	The alternate route may be another PRI arrangement, non-PRI trunk group, private facility, and/or other suitable central office route agreed upon by the customer and the Company.	\$50.00	\$10.00	\$142.49	Yes	No	Required
7	PRIMARY RATE ISDN Calling Name Display	PRACN	Feature	Allows the network to pass Calling Name information (along with the calling line identification) between multiple entities within a PRI network serving arrangement	Requires suitably equipped ISDN switching and terminal equipment and preceding. Calling Name display is limited to within the private network	\$125.00	\$10.00	\$400.00	Yes	No	Required
8	PRIMARY RATE ISDN Dialing Plan	PRADP	Feature	Allows customers to dial between entities on either an access code or abbreviated station to station	This Dialing Plan feature is required any time two or more entities are connected to	\$175.00	\$50.00	\$400.00	Yes	No	Required

Table 15.2.5.3 - ISDN PRI Configurations											
Line Item #	Feature Name	Contractor's Product Identifier	Unit of Measure	Feature Description	Feature Restrictions, Limitations and Additional Information	Non-Recurring Charge	Monthly Recurring Charge	Cost per Change	SAAF Applied (Yes/No)	Delegation Needed (Yes/No)	Required or Discretionary
				dialing basis. Not available on Direct Out.	create a PRI network serving Arrangement. Calls between entities will be considered private, and will not incur usage charges.						
9	PRIMARY RATE ISDN Message Waiting	PRAMW	Feature	Allows the Company's network to pass Message Waiting Indication information between multiple entities within a PRI network serving arrangement.	Requires suitably equipped ISDN switching and terminal equipment.	\$125.00	\$10.00	\$400.00	Yes	No	Required
10	PRIMARY RATE ISDN Subgroup	PRASG	Feature	PRI Subgroup allows customers who subscribe to multiple associated service types within a single PRI serving arrangement to create subgroups, thereby dedicating a certain number of channels to a particular service type	Where facilities and operating conditions permit.	\$125.00	\$10.00	\$400.00	Yes	No	Required
11	PRIMARY RATE ISDN Network Ring Again	PRSRA	Feature	This feature allows a calling station which encounters a busy to notify the central office switch to		\$125.00	\$10.00	\$400.00	Yes	No	Required

26	PRIMARY RATE ISDN Private Facility Connection	PRSPF	feature	Private Facility Connection		\$250.00	\$100.00	\$400.00	Yes	No	Required
27	PRIMARY RATE ISDN Miscellaneous Change Charge	XPB	Change	The PRI Miscellaneous Change Charge applies each time the customer requests a change to the existing basic features and/or optional features of an existing PRI serving arrangement		\$0.00	\$0.00	\$400.00	Yes	No	Required
28	Hunting	HTG	Occurrence	Allows incoming calls to search a group of multiple lines in the same exchange, of same class of service, and of the same customer for an idle line.		\$30.00	\$0.50	\$30.00	Yes	No	Required

Table 15.3.2 - Extended Demarcation Wiring Services

Contractor's Description of Service, include required service description, features and additional features offered by the Contractor: AT&T Extended Demarcation (Extended Demarc) wiring services support the services covered by Contract for all Customer occupied buildings where services under this Contract are being offered. Extended Demarc wiring includes wire/cable related activities required to extend the demarcation point to the Customer defined termination location or cross-connect point from the Contractor's MPOE. Extended Demarc wiring shall include the necessary wire/cable, connectors, jumpers, panel, and jack. Extended Demarc wiring shall also include associated trouble shooting, testing and labeling.

Service Limitations and Restrictions for 15.3.2.a:

- Installation of cabling for extending services from the MPOE location to the Customer's point of utilization
- Installation of cross connects or rearrangement of existing jumpers
- Identification and testing of existing cabling beyond the MPOE to the Customer's Equipment location
- Customer must provide access to facilities
- Customer to provide primary contact information on work orders
- Standard business office environment, working height is no more than 10ft in height in any area, is open and free of insulation or other obstructions, and has easily accessible drop-in panels.
- Removal and/or replacement of interlocking ceiling tiles not included
- Core drilling not included
- Backboards not included
- No special equipment is required to extend cabling (e.g. scissors lifts, extension ladder, hammer drill, concrete saw, jackhammer, etc.)
- Signal repeaters/extenders and media convertors are not included
- Cutting raised Floor tiles not included
- Material sales tax not included
- Performance bond fees not included
- Payment bond fees not included
- Permit Fees not included
- Raceways, conduits, communication poles/power poles, sleeves, surface mount channel raceways, innerduct not included
- Racks and associated hardware not included
- Scissor Lift, Man-Lift, Boom Lift not included
- Expedited shipping fees not included
- All material pricing excludes sales tax; material sales tax shall be applied at time of providing customers a quote and aligned to applicable site project addresses;
- All pricing is based upon California Prevailing Wages, prevailing wage craft, Telecommunications Technician, with exception of conduit, electrical and grounding work. Conduit, electrical and grounding work is based on prevailing wage craft Inside Wireman;
- Alterations or deviations, if any, from subsequent proposed scopes of work, or any delays or postponements of the work by the Client or it's agents which result in additional materials or labor costs will be billed at established unitized pricing. Any extra move on or off the job site due to circumstances beyond AT&T's control will be billed as an extra at hourly labor and equipment rates in effect at the time;
- Pricing is valid through original contract term;
- Client is responsible for identifying all areas containing asbestos, lead paint, and /or other hazardous materials. Client is also responsible for the removal and /or abatement of all hazardous materials and any associated costs;
- Client shall provide a suitable and safe environment for AT&T work at Client's premises. Prior to AT&T's commencement of the work proposed hereunder, Client shall advise AT&T of the presence on Client's premises of any substance or material that is classified as a hazardous material, hazardous chemical, hazardous substance, pollutant, contaminant, or toxic substance under any federal, state, or local law, regulation or ordinance ("Laws") related to the pollution or protection of air, ground or surface water, soil or other environmental media or occupational health and safety ("Hazardous Substance") or any other environmental or safety hazard. AT&T does not handle, remove, or dispose of Hazardous Substances on Client's premises;
- If, during its performance of services, AT&T's employees, subcontractors, or agents encounter a Hazardous Substance or other environmental or safety hazard, AT&T may suspend its performance until Client, at its own expense, completes the clean up and removal of the Hazardous Substance in accordance with applicable Laws or removes hazards to AT&T's satisfaction. Client's failure to abate a Hazardous Substance or hazard within thirty (30) days of AT&T's suspension of performance pursuant to this clause shall constitute a material breach for which AT&T may terminate this contract or the applicable order. Client shall pay AT&T for any costs, expenses, fines, or penalties incurred by AT&T as a result of the presence of the Hazardous Substance or hazard and its suspension of performance;
- All items excludes X-ray and/or radar of walls and floors.
- AT&T does not warrant and / or guarantee customer's existing cable facilities nor warrant or guarantee that the customer's existing cable facilities meets performance requirements, standards compliance or compliance with national or local codes.\

The services within this catalog will expire June 30, 2027, and no replacement contract is currently available. Customers should make plans for alternative solutions to replace their Legacy telecommunications.

Service Limitations and Restrictions for 15.3.2.b:

- The hourly classifications of hours worked for services described in this response/section will be as follows:
 - Regular Hours - Hours worked between 8:00am and 4:59pm, Monday through Friday;
 - Overtime Hours - Hours worked between 5:00pm and 7:59am, Monday through Friday and all day Saturday;
 - Sunday and Holiday Hours - Any hours worked on Sunday or State of California holidays.
- All material pricing excludes sales tax; material sales tax shall be applied at time of providing customers a quote and aligned to applicable site project addresses;
- All pricing is based upon California Prevailing Wages, prevailing wage craft, Telecommunications Technician, with exception of conduit, electrical and grounding work. Conduit, electrical and grounding work is based on prevailing wage craft Inside Wireman;
- Alterations or deviations, if any, from subsequent proposed scopes of work, or any delays or postponements of the work by the Client or it's agents which result in additional materials or labor costs will be billed at established unitized pricing. Any extra move on or off the job site due to circumstances beyond AT&T's control will be billed as an extra at hourly labor and equipment rates in effect at the time;
- Pricing is valid through original contract term;
- Client is responsible for identifying all areas containing asbestos, lead paint, and /or other hazardous materials. Client is also responsible for the removal and /or abatement of all hazardous materials and any associated costs;
- Client shall provide a suitable and safe environment for AT&T work at Client's premises. Prior to AT&T's commencement of the work proposed hereunder, Client shall advise AT&T of the presence on Client's premises of any substance or material that is classified as a hazardous material, hazardous chemical, hazardous substance, pollutant, contaminant, or toxic substance under any federal, state, or local law, regulation or ordinance ("Laws") related to the pollution or protection of air, ground or surface water, soil or other environmental media or occupational health and safety ("Hazardous Substance") or any other environmental or safety hazard. AT&T does not handle, remove, or dispose of Hazardous Substances on Client's premises;

921	Inside Wire Repair Plan - Data	RPL	Each	This inside wire repair plan covers Private Line/Special Access service.	At the customer's request, AT&T will isolate trouble to the simple inside wire, jack, or customer provided equipment. AT&T will perform repairs on the customer's simple inside wire and/or jack. AT&T will isolate trouble associated with customer provided equipment but will not repair, adjust, nor perform any other work on customer provided equipment or facilities. WirePro applies only to line(s) that are covered by the plan (Plan is not transferable).	\$0.00	\$3.50	\$0.00	No	No	Required

Table 15.3.3 - Services Related Hourly Support

<p>Contractor's Description of Service, include required service description, features and additional features offered by the Contractor: Work performed under this Section is authorized only for situations where the Contractor has dispatched personnel to diagnose a service problem that turns out to be caused by factors outside the responsibility of the Contractor (e.g., Network Interface Units/ circuit terminations, etc.). AT&T shall provide a fixed hourly rate schedule for labor classifications common to the diagnosis of contracted services. The rates identified shall only be used for the diagnosis of contracted services and no materials shall be provided.</p>
<p>Geographic Availability: US Domestic</p>
<p>Service Limitations and Restrictions: None.</p> <p>The services within this catalog will expire June 30, 2027, and no replacement contract is currently available. Customers should make plans for alternative solutions to replace their Legacy telecommunications.</p>
<p>State Associated Administrative Fee (SAAF) Charge: Services identified below with "Yes" in the SAAF Applied column will have a 2.5% fee applied to the Monthly Recurring Charge or usage. Charges below do not include the SAAF. The SAAF will appear as a separate line on the customer's invoice..</p>
